Reservations: Jean Hansen, Jeanhans1@aol.com
Please RSVP by January 11th
Please make checks payable to "ASCE – CJB"

Topic of Presentation

Public Private Partnerships (PPPs) are very much in the news these days nationwide. And, with respect to the future of the Turnpike, PPPs have become a very emotional topic here in New Jersey. This presentation will help attendees separate fact from opinion and the reality from the hype so that they may better participate in the ongoing discussion... regardless of which "side of the road" they find themselves.

Outline/Objectives:

- Provide an overview of project delivery methods (PDMs) in terms of a "quadrant framework" in order to put PPPs in context with other PDMs.
- Trace the surprisingly long history of PPPs in the United States with references to historical projects.
- The beginnings of the relatively recent resurgence of PPPs
- How the federal and state laws have changed and continue to change with respect to PPPs as an available PDM
- Case Studies of PPP successes and failures
- Pros and Cons of PPPs – where does reality end and emotion begin?
- Recommendations for going forward
