

2018-2019 ASCE Alaska Section, Juneau Branch

Outstanding Project of the Year

Call for Nominations

This award recognizes the project in Alaska each year that best exemplifies outstanding engineering skill through the design, coordination and execution of the construction.

The project must meet the following requirements:

- The project must have been constructed in Alaska, with the majority of the design work having been performed by Juneau engineers.
- The project must have been completed and put into service during 2018-2019. Individual phases/segments of multiple-phase projects may be submitted upon completion of the phase being nominated. Only the phase being nominated must meet these guidelines.
- No project or project phase/segment may be re-nominated after receiving an award.
- Project nominations must be received no later than **January 31, 2019.**

Nomination Guidelines:

- Please respond to the four categories listed on the following page (Innovation, Benefit to Community, Project Management, Value Engineering). There are no length requirements for nominations.
- Additional information such as pictures or other supporting documentation may be attached.
- Please mail or email nominations to:

AMERICAN SOCIETY OF CIVIL ENGINEERS

INNOVATION

Describe how the project demonstrated the use of innovation in materials, technology or construction methods.

BENEFIT TO COMMUNITY

Describe how the project contributed to the well-being of people and communities

PROJECT MANAGEMENT

Describe how the administration of the project demonstrated resourcefulness in planning and overcame scheduling challenges.

VALUE ENGINEERING

Describe how the design team met the functional requirements of the project in a cost-effective manner.
