

Title: Project Engineer (Structural)
Company: Caldwell Tanks, Inc.
Location: Louisville, KY

Description:

Qualifications:

Caldwell is in need of an experienced, career-minded Project Engineer to be a part of our team. The ideal candidate will be a highly-motivated individual with a strong work ethic.

Essential Duties and Responsibilities:

This position will work with the engineering team to establish project requirements, direct and review the designers detailed drawing packages; will analyze and design steel tank structures with shallow and deep foundations; and will develop drawings packages to communicate design information. Additionally, this position will assist with technical support of the Sales department and serves as “engineer-of-record” on projects where licensed and/or registered.

Education and/or Experience Requirements:

- Registered Professional Engineer (or ability to obtain within one (1) year) required;
- B.S. degree in Civil or Mechanical Engineering with Structural emphasis required;
- Three (3) years’ experience in tank and/or foundation design is preferred;
- Proficiency in the use of AutoCAD;
- Familiarity with AISC ASD/LRFD, AC1318; and,
- Knowledge of AWWA D100, API 650.

Compensation: Commensurate with applicable experience.
