

# JANUARY 2024 MEETING ANNOUNCEMENT

This month we will be hearing from:

***Jennifer Gross***

Title:

## ***Geospatial Empowerment: Leveraging Esri Apps for Efficient Data Management***

Jennifer Gross is a Technical Manager at Michael Baker's Consulting and Technology Solutions Practice. Over the past eight years, she has spearheaded geospatial projects in Alaska and is dedicated to introducing technology solutions to her community. She has been in the geospatial industry for 18 years and resides on a small farm in Palmer with her family.

Jennifer will demonstrate how Engineers and non-GIS users can leverage Esri Survey 123, Experience Builder, and Web Hooks to automate workflows and create dynamic editing interfaces. She will provide project examples showcasing successful implementation of these strategies to empower your organization, improve workflows, and create user-friendly data editing tools.

Discover how these innovative tools can empower your team, simplify workflows, and make geospatial data editing more accessible and efficient for everyone involved.

**WHEN:** January 10, 2024 1200 - 1300

**WHERE:** Matsu College Room JKB 128  
-or- Microsoft Teams Meeting  
Please refer to the meeting email/calendar invite.

**LUNCH:** Pizza (\$10)

In this example, a multidisciplinary team collaborated with Alaska DOT&PF to develop a robust communication system, the Alaska Project Exchange (APEX). APEX was used to inform the traveling public about the 150 construction projects happening throughout the state.
