David Stanley, P.E.

News and Announcements

- On Thursday, November 5, ASCE will celebrate ASCE Day (and our 168th anniversary!) to commemorate our worldwide community of civil engineers. It is a celebration of the rich history, collective impact, and limitless future of our profession. ASCE members are devoted to serving the public good every single day. Let's take this one day to celebrate the day we were founded in 1852 and reflect on the joy and pride of being civil engineers.
- We love fresh, new ideas and could always use a hand in planning, executing, and celebrating all our programs. Join the ASCE Texas Section team and/or the NET Branch team as we advance our communities through the development of civil engineers just like you. Trust us, there's a space for you in our Leadership Laboratory. Volunteer with ASCE NET Branch by contacting Tasha Hux at netasce@gmail.com to learn about available opportunities. Volunteer with ASCE Texas Section by visiting www.texasce.org/resources/volunteer/
- Email Rowdy Dailey (rdailey@spi-eng.com) if interested in YMG.
