

Engineering Specialist 4 - This is an intermediate level, regulatory position responsible for the review and analysis of Environmental Resource Permit (ERP) applications having moderate to complex water resource issues. Responsibilities include coordination of water resource issues with local government permitting programs, other Bureaus within the Division and other Divisions within the District. It requires knowledge of the District's regulatory program as well as knowledge of District operations and planning efforts. Work is performed under strict deadlines.

The position requires knowledge of hydrology, hydraulics and computer software related to water resources. Knowledge of permitting programs, criteria and practices, as well as construction methodologies. Experience in reviewing construction plans and specifications, engineering and environmental reports and the use of water resource computer programs. Skills and experience communicating credibly with engineering professionals, attorneys, construction professionals, developers, agriculturists and interested parties. The selected applicant must be able to analyze moderate to complex ERP applications and skillfully prepare the necessary written and oral reports commensurate with the complexity of the application.

Employment Guidelines: Typically has Bachelor of Science degree from an ABET/EAC accredited program in Agricultural, Civil, Environmental, or related engineering field and four years of qualifying experience that demonstrates measurable career progression in water resource engineering including at least one year of experience with the ERP program. Prior experience analyzing ERP application documentation, preparing staff reports, using regulatory databases, and familiarity with SFWMD business processes are preferred. The candidate must be extremely organized and have the ability to work in a deadline-driven environment.
