

Section Leader – Engineer - Leads and supervises a section of Professional Engineers, Engineer Interns, Engineering Specialists and technical support staff in the review of Environmental Resource Permit (ERP) applications in accordance with new or established criteria, accepted hydrologic and surface water hydrology principles, and routine or complex surface water activities; provides technical advice to other South Florida Water Management District units and external organizations, as representative of the District.

Requires knowledge of advanced surface water hydrology, ERP rules and regulations, applied mathematics and experience in the use of state of-the-art computer hardware and software. Incumbent must be proficient in utilizing maps, reading construction plans and specifications, interpreting engineering and environmental reports as well as water resource computer programs/models output reports; and experience in communicating effectively with other engineering professionals, environmental scientists, attorneys, construction professionals, developers, agriculturists, civil engineers, and with others involved with the District's regulatory program. Job duties include daily interaction and coordination with direct counterparts and staff members within the natural resources, consumptive use and post permit-compliance sections

Employment Guidelines: Typically has a Bachelor's degree in Civil Engineering, Environmental Engineering, Agricultural Engineering, or related engineering field. At least ten (10+) years of qualifying experience, including four (4) years of supervisory experience.

Job Reference [2584BR](#)
