

**Company:** Baxter & Woodman, Inc.

**POSITION:** Water/Wastewater Engineer III

**POSTION LOCATION:** West Palm Beach, Orlando, or Fort Lauderdale, FL

**POSITION SUMMARY:**

Baxter & Woodman has a rewarding opportunity for a full-time Water/Wastewater Engineer III. The position will be in our Water/Wastewater Group. The Water/Wastewater Engineer III will assist with managing projects, developing business, serving clients and designing pump stations, water and wastewater projects. The successful applicant will be provided with a rewarding combination of design and business development assignments and excellent career development opportunities.

**POSITION DUTIES:**

- Design of storm water, potable water and wastewater pipelines and pumping stations.
- Evaluation and study of water and wastewater treatment plants.
- Preparation of potable water and wastewater master planning reports.
- Planning and review of water and wastewater infrastructure improvements.
- Develop, plan, and design drinking water and wastewater treatment projects.
- Support the development of engineering project proposals with the marketing team.
- Make decisions independently and take responsibility for project engineering solutions.
- Represent the company in client and agency meetings to resolve questions and to plan and coordinate work.
- Develop and enhance client relationships and business growth.
- Work with department managers to develop department standards and complete peer reviews
- Represent the company at Professional organizations.
- Application of sustainable design elements as they relate to water, wastewater, and energy conservation and efficiency.

**REQUIREMENTS:**

- Registered Professional Engineer in Florida.
- B.S. degree in Civil or Environmental Engineering with an emphasis in water/wastewater treatment and hydraulic coursework.
- 5 or more years of progressive experience in the design of water and wastewater projects.
- Experience with creating and manipulating water/wastewater hydraulic models using Bentley Systems and InRoads software products is required.
- Experience in the design and construction of mechanical piping and pumping systems is desired.
- Ability to travel throughout assigned office service areas (own transportation).
- Excellent technical writing skills.
- Ability to work in a team environment.
- Strong written, verbal, computer and organizational skills.

**Baxter & Woodman is an equal opportunity - affirmative action – M/F/Vet/Disability employer**
