

EAC Consulting - Water/Wastewater - Project Manager/Sr. Engineer

EAC is a leading engineering firm that provides engineering excellence and exceptional client service. Engineering services include: Water and Wastewater Collection and Distribution Systems, Airports and Ports, and Land Development Design. EAC also provides Highway, Bridge, Tolling and Intelligent Transportation Systems (ITS) and Transit design and planning services.

Named ASCE Miami Chapter Employer of the Year (2019) and Southeast Top Design Firm (2018 & 2017) by Engineering News Record, EAC has a diverse team of dedicated engineers and professionals, but is always seeking talented and experienced engineers to join our growing family. EAC offers competitive salaries, professional development and benefits (including those that promote a healthy work/life balance).

Position Location: West Palm Beach

Candidate must be authorized to work in the United States for any employer.
EAC is an Equal Opportunity Employer.

EDUCATION:

Bachelor's Degree in Civil Engineering required.
Registered as a Professional Engineer (PE) required.

EXPERIENCE:

Minimum of ten (10) years post registration engineering experience.

Respond via: <https://www.eacconsult.com/opportunities/> or phone (305)265-5400.

KNOWLEDGE, SKILLS AND ABILITIES:

- Knowledge of codes and engineering practices.
- Skills - excellent communication skills; verbal presentations and technical writing.
- Problem solving and analytical skills.
- Skills - CADD (including 3D) and other design tools.
- Able to understand, analyze, and process complex technical information and materials.
- Able to coordinate, write, and edit specifications as they apply to engineering projects.
- Able to effectively work independently and within a team.
- Able to plan tasks and implement action items.
- Able to exhibit a professional demeanor and attitude when interacting with colleagues and clients.
- Able to support Business Development functions.

ESSENTIAL FUNCTIONS:

- Serves as Engineer of Record, as needed.
- Performs and directs quality control reviews in accordance with company policy to deliver projects of the highest quality.
- Delivers a quality project on schedule and meets the budget and financial requirements established for the project (both for the client as well as for EAC).
- Assists management where required.
- Assists in Business Development to include: technical write-ups, meeting attendance and participation in interviews and presentations.
- Maintains positive relationship with current and past clients.
- Prepares or directs the preparation of complex project documents - including specifications and bid documents to ensure that items mentioned on plans appear in specifications, and verifies the layout and accuracy of bid packages.
- Performs and directs others in all technical and some management aspects of delivering projects to clients. Supervises the scoping, implementation and design of plans.
- Develops and negotiates fee proposals on projects and then manages the project successfully to satisfy the needs of the client. Delivers quality products on schedule, and meet the budgets and financial requirements established for projects (both for the client as well as for EAC).
- Seeks out engineering innovations that will differentiate EAC from the competition and add value to the client.
- Performs and directs external communications - such as making telephone calls and preparing correspondence to clients, officials, and contractors.
- Writes proposals for future work. Contributes to proposal reviews.
- Demonstrates full understanding of client and jurisdictional requirements, scope of services, budget requirements (for client and EAC), technical requirements for the project, and ability to plan and deliver projects successfully.
