

## **Civil Engineer (Project Manager or Project Engineer)** **Santa Rosa, CA**

Summit Engineering, Inc. is seeking a professionally licensed civil engineer with proven project management and leadership skills. This position is responsible for managing engineering tasks and projects which may include civil engineering specific or multi-discipline work. Project Managers are responsible for design team leadership, internal project organization, preparing project proposals, design engineering, scheduling and budgeting, as well as business development and generating new work for the firm. Technical areas of design work include sustainable site design, stormwater mitigation measures, grading, utility layout, pavement design, roadway geometry as well as hydraulic, hydrologic and earthwork calculations.

This unique individual comes with a passion for what they do, an enthusiastic attitude and the ability to work efficiently with a team, managing many tasks in a fast-paced environment. This experienced person will utilize their professional background to provide project management and design engineering on winery, custom residential, commercial, healthcare, water/wastewater treatment, bio-energy, and educational building type projects. Communication with clients and providing them with quality and creative design solutions are paramount to the success of our firm.

### **Qualifications/Skills:**

- B.S. Degree in Civil Engineering or equivalent.
- California Professional Engineering License (P.E.).
- QSD/QSP and LEED AP certifications preferred.
- 5+ years engineering experience showing progressively increasing responsibility.
- 2+ years project management experience, including proposal preparation, project staffing, scheduling, monitoring scope and budgets, and construction document preparation.
- Technical expertise in at least one area where Summit performs a significant amount of work, such as site development, grading, drainage and utilities.
- Knowledge of sustainable site design practices.

### **Company Description:**

Summit Engineering is a multi-discipline engineering firm with divisions in Civil, Structural, Water/Wastewater, Planning, and Electrical Engineering. Our 40+ employee firm is the leading provider of consulting engineering services for winery projects throughout California, and has been in business for over 38 years. Additional markets include brewery, resort, custom residential, commercial, and small municipalities. Summit is known for excellent long-term client relationships and an unwavering commitment to quality in our work.

For 11 years now, Summit Engineering, Inc. has been voted one of The Best Places to Work in the North Bay. We offer competitive salaries, full benefits including a company paid 401K, support for training and development, and an alternative work week schedule with every other Friday off.
