

Subject: URGENT - Last Call for Best Rate - Symposium for Sustainable Infrastructure at University of Colorado (Denver) – April 5 & 6, 2019.

PLEASE DISTRIBUTE

REGISTER BY FRIDAY, FEBRUARY 1 FOR THE BEST RATE!

We hope you'll join us for the Symposium for Sustainable Infrastructure encore, SSI-3. The focus is on "The City We Have, The City We Want." This is very appropriate considering Colorado's growth is projected to increase by 39% to 7.8 million in 2040. Infrastructure needs are critical. Best practices are needed.

SSI-3 will be held April 5-6, 2019 at the Marriott Springhill Suites Denver Downtown at the Auraria Campus (1190 Auraria Pkwy, Denver, Colorado, 80204). The Symposium brings together design and construction professionals, government officials, academics and students from all areas, including private companies, government agencies, utilities and universities.

Ron Sims, former Deputy Secretary for the U.S. Department of Housing and Urban Development (HUD) from 2009-2011 will be our keynote speaker. APA, ASCE, and APWA national sustainability professionals will headline a tremendous lineup of consecutive panel discussions. We expect to bring 150 attendees together for two full days of learning and networking. The second day is devoted to ENVISION training that will empower many to assess sustainability projects using tools developed by the Institute for Sustainable Infrastructure.

The latest program and registration materials can be found [here](#).

Information about ENVISION is available at the [ISI website](#). Professionals, faculty members and students will be registering for this training. This training is limited to 50 people.

Join us for SSI-3 and take the opportunity to interface with some of the brightest minds in academia, engineering, planning, and policy. At Friday close, join us for a complimentary craft brew at Happy Hour!

A big thanks to our principal sponsors: American Planning Association Colorado Chapter, American Society of Civil Engineers Colorado Section, the University of Colorado (Denver) Center for Sustainable Urbanism, the American Public Works Association Colorado Chapter, and the Institute for Sustainable Infrastructure (ISI).

[Sponsorships and underwriting packages](#) available.
