

## Meeting Minutes

September 9th, 2009

Construction Site: US-54, under the Rock Road Bridge

President Slade Engstrom called the meeting to order at 11:50 am. He introduced the Wichita Branch board members. Past-President Jessica Rhein announced the upcoming Adopt-a-Highway trash pickup day on Thursday, October 15th, 2009.

Jake Borchers introduced the speaker, Mr. Terry Grote from Cook, Flatt & Strobel Engineers, P.A. to speak about the US-54 (East Kellogg) Construction Project through Rock Road and Armour Road. Terry noted that the project is scheduled to be complete on November 6th, 2009. Terry noted that there were many parties involved in the design and construction of this project. There were a number of Contractors who had had some involvement in the project including Wildcat Construction Company, Cornejo & Sons, Inc., and King Construction Company, who were represented at the meeting. Terry noted that the total expected construction cost for completion of the project was \$47,740,946.80. He noted that meeting attendees were sitting under the nearly complete Rock Road Bridge, which provides twelve total driving lanes with 2 left-turning lanes, 3 through lanes, and a turnaround. The bridge is 46 meters long by 58 meters wide; the bridge was constructed using cast-in-place, post-tensioned reinforced concrete girders.

Drainage is carried underground to a large underground storage box, a double 8'x8'x300'+ reinforced concrete box (RCB), before being pumped off-site. Terry described many of the construction material quantities that were needed to construct the project, including the earthwork required to bring mainline US-54 under Rock Road and the cubic yards of concrete used to construct the Rock Road bridge. Mr. Grote briefly described the MSE wall construction and the Soldier Pile and tie-back system utilized to support the walls. At the conclusion of his presentation, Mr. Grote answered questions from those in attendance.
