

FEBRUARY MEETING ANNOUNCEMENT

We will be talking with...

Chase Nelson, P.E.

Water and Sanitation Engineer, DOWL

Title:

Alaska Water and Sewer Challenge

For the past four years, the State of Alaska Department of Environmental Conservation Village Safe Water (VSW) Program has been working to address the water and sanitation needs in Alaska's most remote and under-served communities. Through this innovative design competition, VSW has been working to develop technologies for providing water and sanitation needs on a house-hold by house-hold level, instead of an expensive community wide piped water and sewer system. DOWL is one of the teams in the initiative and is currently working with a number of rural communities on household filters and graywater recycling systems.

WHEN: **Wednesday, February 13, 2019**
12:00-1:00 p.m.

WHERE: **Mat-Su College, Room JKB 108**

LUNCH **\$7 for pizza**
