

# OCTOBER MEETING ANNOUNCEMENT

This month we will be talking with:

***Steve Rowland, with RECON, LLC***

Title:

***North Slope Moose Pad Project***

This presentation will review everything from initial project reconnaissance through final construction. The unique engineering challenges associated with arctic coastal plain development will be discussed, as will construction methodology that is characteristic of the arctic environment. The Moose Pad Project included a three-mile-long gravel access road, a 14-acre drill pad, 10 miles of ice road and three miles of new pipeline. The drill pad was designed for fifty wells and an expansive oil processing facility. Frozen gravel fill was sourced from a distant borrow site and totaled 280,000 cyds.

**WHEN:**            **Wednesday, October 14, 2020**  
**12:00-1:00 p.m.**

**WHERE:**           [Join Microsoft Teams Meeting](#)  
Either use the app or join through a web browser.

**LUNCH**            **N/A**
